SUMMARY

Junior Software Developer with professional experience in Full-Stack Development, Social Media API Integration, Rule Engine implementation, and AI-powered application development. Skilled in Python, JavaScript, React.js, Next.js, REST APIs, Git, Jira, and Google Cloud with experience building scalable web applications and automation workflows.

Core Competencies: Full-Stack Development, REST API Integration, Social Media Automation, Rule Engine Development, Web Scraping, Task Scheduling, Responsive UI Development, QA Testing, AI Applications.

EDUCATION

Bachelor of Technology (Computer Science and Engineering) June 2025
Raghu Institute of Technology, JNTU-GV
Percentage: **74%**

TECHNICAL SKILLS

Programming Languages	Python, Java, JavaScript, TypeScript, C, C++
Frontend	HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Next.js
Backend	Node.js, Express.js, REST APIs, OAuth 2.0
Databases	PostgreSQL, MySQL, Prisma ORM, Firebase
Cloud	Google Cloud Platform (Vertex AI), Docker
AI / ML	LangChain, Prompt Engineering, RAG, Large Language Models (LLMs)
Developer Tools	GitHub, GitHub Copilot, VS Code, Jira, Claude AI, Windsurf, Antigravity
CMS / UI Tools	Lynon Backoffice CMS, Figma
Methodologies	Agile, Scrum, Software Development Life Cycle (SDLC)

PROFESSIONAL EXPERIENCE

Junior Software Developer Nov 2025 – Present
Infinetix Pvt. Ltd. *Remote*

- Developed and maintained scalable full-stack web application features using Next.js, React.js, TypeScript, Tailwind CSS, Node.js, Prisma ORM, PostgreSQL, and REST APIs.
- Integrated OAuth 2.0 authentication and REST APIs across 5 social media platforms (YouTube, Facebook, Instagram, LinkedIn, and X), reducing manual publishing effort through workflow automation.
- Developed 20+ configurable Rule Engine workflows to automate publishing, scheduling, OAuth validation, API rate limits, and platform-specific business rules.
- Developed reusable contact form workflows with server-side validation, automated email notifications, and response handling to streamline customer communication.
- Built reusable web scraping and automated scheduling workflows for periodic content collection, processing, and publishing automation.
- Maintained and enhanced 20+ responsive UI pages while implementing Figma-based responsive CSS improvements.
- Performed functional, UI, regression, and API testing, validating fixes for 30+ production defects before release.
- Built reusable React components adopted across 15+ application pages, improving development consistency and reducing duplicate UI implementation.
- Utilized Git, GitHub, Jira, Prisma ORM, and Agile methodologies throughout the Software Development Life Cycle (SDLC).

PROFESSIONAL TRAINING

Python Full Stack Development Program

Jun 2026 – Oct 2026

Codegnan IT Solutions

- Completed intensive project-based training in Python Full Stack Development.
- Developed 4+ real-world applications using Python, React.js, Node.js, Express.js, MySQL, and REST APIs.
- Implemented authentication, database integration, responsive web design, and API-driven application development.

Google Cloud Generative AI Virtual Intern

Jul 2024 – Sep 2024

Google Cloud — EduSkills

- Developed Retrieval-Augmented Generation (RAG) pipelines using LangChain, Vector Databases, and Vertex AI for intelligent document retrieval.
- Applied Responsible AI principles including fairness evaluation, explainability, transparency, and ethical AI practices.

PROJECTS

AI-Assisted Code Review System

[GitHub](#)

- Developed an AI-powered code review system to automate manual code inspection by identifying formatting issues, coding standard violations, and logical defects using NLP, Prompt Engineering, Python, LangChain, OpenAI GPT-4 and LLM.
- Automated source code analysis to identify formatting inconsistencies, coding standard violations, and potential logical defects.

Voice-Controlled Personal Assistant (Ongoing)

[GitHub](#)

- Developing a voice-enabled personal assistant using Python and Google Speech Recognition APIs.
- Implementing speech recognition, natural language understanding, task automation, application launching, and voice-based system control.
- Currently integrating conversational AI capabilities and real-time information retrieval to enhance user interaction.

Smart Travel Itinerary Planner (Capstone Project)

[GitHub](#)

- Designed a Flutter-based itinerary planning application integrated with Firebase and Google Maps APIs.
- Implemented daily scheduling, budget tracking, route optimization, offline accessibility, and multilingual support.

CERTIFICATIONS

- Prompt Engineering and Advanced ChatGPT – edX.
- Generative AI Engineering – IBM (Coursera).
- Ethics in the Age of Generative AI – PMI.
- IBM HTML5, CSS3, and JavaScript Web Development – Forage

LEADERSHIP & ACTIVITIES

- **Best Student Volunteer Award (NSS)** – Received institutional recognition for outstanding contribution, leadership, and active participation in National Service Scheme (NSS) community service initiatives.
- **Student Leader, NSS Special Camp (2023):** Led a team of over 60 volunteers to organize digital literacy, sanitation, and health awareness programs benefiting rural communities.
